

AI Prompts

Copy these prompts into AutodeskGPT and modify, if needed. This section will be expanded over time.

General format

Start with the goal

Specify what kind of output you expect GPT to generate for you

Tip: GPT tends to remove list formatting - don't worry!

Keep the text suggestion consistent with our style guidelines. Recommended to include in all prompts, either in the original prompt or as part of follow up.

Example:

I am working on a [insert content format, for example, tooltip or empty state] for our product. It needs to include a short headline up to [X characters and body up to X characters]

Include our guidelines

These style guidelines are worth including into every prompt

Take the following guidelines into consideration when generating text:

- US English spelling
- active voice
- sentence case (in headers, too)
- we use the Merriam-Webster dictionary and Chicago Manual of Style
- our tone is confident, informative, and accessible

Follow up

Add more prompts to your interaction to fine-tune the suggestions

The header you suggested is written in title case. Make sure it's in sentence case.

Can you simplify the following suggestion so it's easy to understand for someone without deep technical knowledge?

Can you improve this suggestion so it focuses on the action expected from the user rather than an extensive technical explanation?

This is a good direction but we don't use the term [insert misused term]

in our product UI. We call it [insert correct term]

Please rewrite the suggestion with this in mind.

I like this direction but it sounds more fit for a blog headline. The text I'm working on is part of the product UI. Please adjust your suggestion with this in mind. For example, the title has to be more factual and concise.

Use cases

You need a quick proofread

I am a content designer working on a

[insert content format, for example, tooltip or empty state] for our software. I've written a suggestion. Please review grammar, spelling, and punctuation without changing tone and style.

[Insert suggestion here]

You are looking for a general improvement

I am working a content designer on a

[insert content format, for example, tooltip or empty state] for our product. It needs to include a short title up to [X characters and body up to X characters]

I have a suggestion but I feel it can be improved. Can you suggest an improved version of this text?

[Insert suggestion here]

Are grammar and spelling correct? Does it clearly communicate information to the user? Take the following guidelines into consideration when generating text:

- US English spelling
- active voice
- sentence case (in the title, too)
- we use the Merriam-Webster dictionary and Chicago Manual of Style
- our tone is confident, informative, and accessible

You have some specific things in mind that need to be improved

I am working on a

[insert content format, for example, tooltip or empty state] for our product. It needs to include a short title up to [X characters and body up to X characters]

Can you review the following suggestion? Does it clearly

communicate information to the user? Please make it more concise, split it into shorter sentences, and make sure the

action expected from the user is clear. [Modify this part depending on what you'd like to improve]

[Insert suggestion here]

Take the following guidelines into consideration when generating text:

- US English spelling
- active voice
- sentence case (in the title, too)
- we use the Merriam-Webster dictionary and Chicago Manual of Style
- our tone is confident, informative, and accessible

Existing text is too technical

I am working on a

[insert content format, for example, tooltip or empty state] for our product. It needs to include a short title up to [X characters and body up to X characters]

We have a suggestion but I believe it sounds too technical and might be hard for the user to understand. Can you review the following suggestion and optimize it?

[Insert suggestion here]

Are grammar and spelling correct? Does it clearly

communicate information to the user? Take the following guidelines into consideration when generating text:

- US English spelling
- active voice
- sentence case (in the title, too)
- we use the Merriam-Webster dictionary and Chicago Manual of Style
- our tone is confident, informative, and accessible

Describe the need freeform

I am working on a

[insert content format, for example, tooltip or empty state] for our product. It needs to include a short title up to [X characters and body up to X characters]

Here's a user story outlining what's happening:

Given:

[describe prerequisites]

When:

[what are the conditions leading to the new behavior?]

Then:

[what happens?]

And:

[anything else?]

Based on this information, please provide

[X]

suggestions. Take the following guidelines into consideration when generating text:

- US English spelling
- active voice
- sentence case (in the title, too)
- we use the Merriam-Webster dictionary and Chicago Manual of Style
- our tone is confident, informative, and accessible

We are working on a new feature in the product. It will allow the user to

[insert feature description]

for our product. To communicate this to our users, I am working on

[insert content format, for example, tooltip or empty state]

It needs to include a short headline up to

[X characters and body up to X characters]

Based on this information, please provide

[X]

suggestions. Take the following guidelines into consideration when generating text:

- US English spelling
- active voice
- sentence case (in the title, too)
- we use the Merriam-Webster dictionary and Chicago Manual of Style
- our tone is confident, informative, and accessible

Other examples

Describe the need with a user story

I am working on a

[insert content format, for example, tooltip or empty state]

for our product. It needs to include a short title up to [X characters and body up to X characters]

Here's a user story outlining what's happening:

Given:

[describe prerequisites]

When:

[what are the conditions leading to the new behavior?]

Then:

[what happens?]

And:

[anything else?]

Based on this information, please provide

[X]

suggestions. Take the following guidelines into consideration when generating text:

- US English spelling
- active voice
- sentence case (in the title, too)
- we use the Merriam-Webster dictionary and Chicago Manual of Style
- our tone is confident, informative, and accessible

Describe the need freeform

I am working on a

[insert content format, for example, tooltip or empty state]

for our product. It needs to include a short title up to [X characters and body up to X characters]

We have a suggestion but I believe it sounds too technical and might be hard for the user to understand. Can you review the following suggestion and optimize it?
